EDUCATION

Bachelor of Computer Information Systems, Cal Poly Pomona Expected Dec. 2026

Relevant Coursework: Network Security, Contemporary Operating Systems, Cloud Infrastructure, Database Design and Development, Client-Side Web Development

Certification, CompTIA Security+ (In Progress) Expected Jan. 2027

Associate of Business Administration, Southwestern College Aug. 2021 - May 2025

EXPERIENCE

Clinical Analyst Intern June 2026 - Aug. 2026

Paradise Valley Hospital *National City, CA*

- Troubleshoot MEDITECH EHR applications and clinical information systems, providing technical support and resolving issues for hospital staff.
- Performed requirements gathering, workflow analysis, data validation, and QA/UAT testing for clinical software implementations in a HIPAA-regulated environment.
- Collaborated with networking and telecommunications teams to resolve hospital-wide incidents, helping reduce average departmental issue-resolution time by 40%.

Central Supply Technician May 2023 - June 2025

UC San Diego Health *San Diego, CA*

- Participated in testing and provided feedback during deployment of new IS applications and IoT-based supply chain systems; reported errors impacting hospital operations and patient care.
- Managed and organized medical supply inventory using IoT-based applications, maintaining accurate stock levels and supporting daily healthcare operations.

PROJECTS

Database Design Project

Microsoft SQL Server, Erwin Data Modeler

- Designed an entity-relationship model in erwin Data Modeler and implemented the relational schema in Microsoft SQL Server.
- Wrote SQL queries using joins and aggregate functions and applied primary keys, foreign keys, and constraints to maintain data integrity.

Esports Business Intelligence Dashboard

JavaScript, React, Angular, HTML/CSS

- Built a responsive business-intelligence dashboard using React, JavaScript, HTML, CSS, and Chart.js to visualize esports management metrics.
- Designed the application using Figma, and implemented synthetic data with JSON and CSV files; displaying it with self-designed charts through Chart.js.
- Initially developed the application in Angular, then rebuilt it as a React progressive web application.

SKILLS

Programming Languages

Python, Java, SQL, JavaScript, HTML5, CSS

Tools

VS Code, MSSQL, MySQL, Git, GitHub, Tableau, Figma

IT Technical Skills

Systems & Database Administration, Network Configuration, Incident Response
